DETAILED ACTION

Reasons For Allowance

1. Claims 1-27 are allowed.

2. The following is an Examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claimed invention of modeling compounds. Specifically, independent claims 1, 23, 26, and 27 disclose the selection of a pattern that represent compounds and the use of a cascade of an unsupervised with a supervised learning system to model the mapping of the compounds.

The closest prior art of Hutcheson et al (U.S. Patent Number 5,274,714 A; dated 28 DEC 1993; class 382; subclass 157) teaches a method and apparatus for determining and organizing feature vectors for neural network recognition, but fails to teach or suggest the selection of a pattern that represent compounds and the use of a cascade of an unsupervised with a supervised learning system to model the mapping of the compounds. To the extent that this feature is not present in the prior art of record, the present case is found to be allowable over the art of record.
